

Media regulations should ABSOLUTELY NOT BE RELAXED on June 2nd. The test case of radio since 1996 has proven that the public interest ultimately loses out when corporations are allowed to dominate access to the public's airwaves. I am furious that Chairman Powell is pushing these changes through without a substantial public discussion - the public interest in this country is going to suffer incredibly from the proposed changes in TV and newspaper ownership. Just because Chmn Powell and the two other Republican commissioners don't mind getting all their news from Fox, doesn't mean the everyone else in this country chooses to be spoon fed corporate, conservative propoganda. The annals of history will surely mark June 2nd as a dark day for diversity, localism and competition on America's public airwaves. How dare Chairman Powell be so irresponsible with my free access to diverse information? Please do not let these proposed changes go through. Thank you.
